

▶ Designer – Site & Energy Team

Stahl Sheaffer is currently seeking to hire multiple **Designers** to join our Site and Energy Team in our Clearfield, Pennsylvania or Morgantown, West Virginia office locations.

Site & Energy Designer Responsibilities:

- Assist the project team in the development and design of site and/or energy projects which consist of the plans, technical specifications, and regulatory deliverables
- Develop feasible design alternatives and compare significant parameters
- Review design details and coordinate technical recommendations
- Assess the cost-effective constructability of the project and generally evaluate the quality of the project
- Provide day-to-day technical support, guidance, and input
- Assist in the preparation or modification of reports, studies, permits, and designs for various projects

Minimum Requirements for the Position:

- Engineer-in Training (EIT)
- Bachelor's degree in Civil Engineering
- The ability to obtain state and federal background clearances to permit working on-site when necessary
- A valid driver's license and daily access to a motor vehicle

Preferred Qualifications:

- Up to 5 years of experience with engineering projects relating to land development, stormwater, and transportation designs and development of bid packages for project advertisement into construction
- A highly organized approach to tasks and a high level of initiative
- Working knowledge of site civil engineering, environmental and municipal regulations, drainage, stormwater management, and E&S control as they relate to design
- Proficient working knowledge of CADD programs especially Autodesk Civil 3D
- Proficiency with Microsoft Office programs including Word, Excel, and PowerPoint
- Excellent oral, written, and interpersonal skills with co-workers and clients
